Air Drying Oven
by PREISER SCIENTIFIC

Preiser Model 200 Air Drying Oven

The Preiser Air Drying Oven provides for the partial drying of coal to bring it to near equilibrium with room temperature before further reduction and division in accordance with ASTM D2013. Oven is often used for drying float/sink samples.

Features

- Large and roomy mechanical convection oven that contains 6 shelves.
- Control panel with solid-state digital temperature control that maintains temperature uniformity throughout the oven using two 24-hour interval timers to operate the heating elements and the fan motor.
- Temperature range from 0-105°F.
- Can be used with two different drying trays. One tray is 9 7/8”W x 21 ½”L x 1 ½”H. The second tray is 16”W x 16”L x 1 ½”H.

Supplied with

- Six shelves
- Solid-state control panel consisting of digital temperature control and two 24-hour interval timers.
